Organisational structure of a computer system - Wikiopen. ■Organisational Structure of a Computer system.■Elements of a Computer Architecture System Architecture - Wikipedia.Unit I. Basic Structure of Computers..The relations of structural body dimensions and hip and back pain in middle-aged and older men and women. To investigate the relations of waist circumference, hip circumference and body mass index with self-reported hip and back pain in a cross-sectional population-based sample of middle-aged and older men and women. In a cross-sectional population-based study, 2931 participants aged 50-75 yr (1365 men and 1566 women) were interviewed at home about hip and back pain and additional health and lifestyle factors. Measures included hip and back pain by questionnaire, body mass index, waist and hip circumferences, socio-economic factors, smoking and alcohol intake. The prevalence of self-reported hip and back pain was 33.2% (men) and 31.4% (women), respectively. Multivariate analyses indicated that among men, waist circumference was significantly associated with hip and back pain. The odds ratios (2d92ce491b
