
Asus P8h61-M Le Sm Bus Controller 62 beriben

Front panel. 1. Front panel. 2. Power supply 4x9 (1900 mAh). 5. USB Ports (2x 2.0) for USB. 1x USB 2.0. 6. USB 1.1 (1x 2.0) for USB 2.0. 1x USB 2.0 (mini type-B) for USB 2. 0. 2x USB 2.0 (full type-B) for USB 2. 0 (for installing power). The front panel connector is used to provide power to the motherboard. If the power supply is connected, the power on indicators can be seen. There is one display port, but due to a budget constraint, we recommend using one of the composite video monitors that you have laying around for the display port. If the display port is not used, then there is no power to the onboard VGA port. Also note that Asus uses a proprietary cable connector to link the VGA to the HDMI video port, so you will need to either use the Asus provided cable or an aftermarket cable. The power supply must be designed for 12 volt operation. If using an adapter which is not a 12 volt adapter, you could fry the motherboard. We recommend using an adapter which is a true 12 volt adapter. Some adapters will not output the proper voltage at a lower voltage, and you could fry your motherboard. We also recommend having a power management system if the power supply is capable of controlling the motherboard's power supplies automatically. This is to insure the power supply always operates at the required voltage. This is not a problem with the power supply as it is always supplying the required voltage. Even with a power management system, it is possible the motherboard's voltage may be dropping too low for power on when the motherboard is powered off. Please refer to the motherboard manufacturer's manual for more information on this subject. 4x9 power supply : Formal power supply 4x9 (1900 mAh). 5x9 power supply : Formal power supply 5x9 (1700 mAh). 4x9 power supply : Formal power supply 4x9 (1900 mAh). 5x9 power supply : Formal power supply 5x9 (1700 mAh). 4x9 power supply : Formal power supply 4x9 (1900 mAh). 5x9 power supply : Formal power supply 5x9 (1700 mAh). 5x9 power supply : Formal power supply 5x9 (1700 mAh). 5x9
